

BOLLARD

Drive Thru Accessory

A bollard helps protect your property, as vehicles travel in and out your drive-thru lanes. It effectively directs traffic, guiding drivers around curbs to see where to turn and stop along the side of the building.

Bollards situated by the pay window let drivers know how close they should drive beside the windows, preventing damage to customer vehicles as well as the areas surrounding the windows.

Illuminated bollards allow for even more safety precautions at night.

SPEAKER POST FEATURES

Business

Did you know?

DSA products are made of aluminum extrusions

Unlike assembled & bent sheet metal, **aluminum does not age:**

- » reinforced aluminum profile
- » more resistant to bending or denting
- » no visible welds or hardware, no rust
- » recyclable & sustainable,

aluminum does not fail:

- » non-sparking, noncombustible
- » seamless, precise angles & corners
- » resists corrosion
- » lightweight, easy to install.
